Solutions for better hearing

switch

Hearing. Design. Comfort.
In a new dimension!

switch

– the innovation for sophisticated and modern people

Experience optimum hearing comfort and ease of handling in one remarkable design. After all, no one needs to see that you can hear perfectly well again.

Hearing

switch is the modern shape of simply good hearing based on the "open fitting" principle. Your ears are not occluded leaving the sound of your own voice perfectly natural.

– in astounding quality

switch intelligently targets and amplifies only those sounds that you can not hear so well any more. The result is enhanced speech comprehension in a natural sound environment.

At the touch of a button you can access different listening programs that customise your listening requirements.

switch colour range

silver gray

charcoal/
anthracite

beige

Design

– as a fashion accessory

switch is the winner of the German Universal Design Award.

Its remarkable and ergonomic design makes for an attractive hearing aid that looks more like a fashion accent statement.

Available in three complementing colours, the fine uni-wire between the hearing aid and the speaker emphasizes a modern high-tech image.

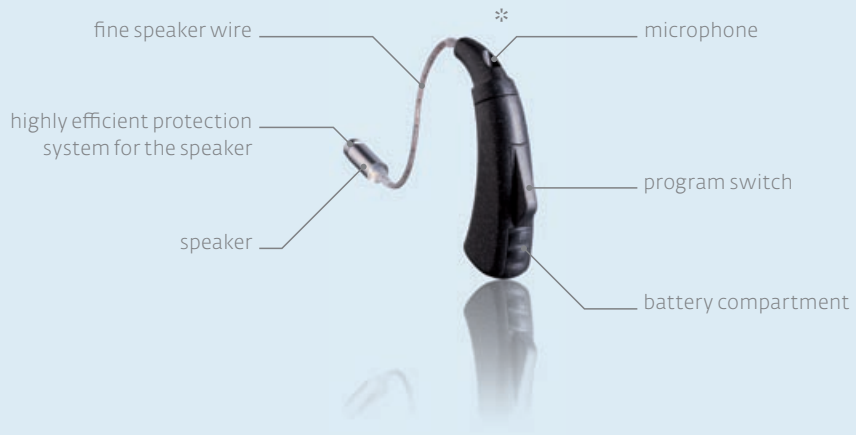

Comfort

– you hardly notice

switch is as light as a feather and connects so perfectly that it is hardly noticeable. Once in place, switch fits snugly into your ear and is even suitable during sports play.

Its superior design means that you can wear switch everywhere and everyday.
